

2012 Farmland Preservation Forum

Balancing Agriculture and Resource Demands of Rural Ontario

Friday, February 17th; University of Guelph

Join us on the **17th** for a **dialogue** about **intensifying land use demands** in rural Ontario.

How do we support both land **conservation** and **rural economic development**?

- > **Learn from Case Studies**
- > **Forge New Partnerships**
- > **Set New Policy Directions**

Why Attend?

Urban growth, aggregate pits, infrastructure projects, green energy, endangered species habitat – all of these impact agriculture and can result in permanent loss of our best farmland.

We need your voice as part of the discussion about how to improve policy and planning for agriculture within Ontario's diverse countryside economy.
